

Hair Removal Techniques	Pros	Cons
Plucking and tweezing	Easy to do, no fancy equipment is required	<ul style="list-style-type: none"> -Hair tends to grow back quickly. -Could leave a bumpy skin texture
Waxing	Gives a nice smooth finish to the shaved area	<ul style="list-style-type: none"> -Not a painless procedure to go through
Depilatory Creams	Painless	<ul style="list-style-type: none"> -Expect to need multiple applications in order to get rid of the chin hair.
Prescription medications (birth control pills, Spironolactone)	Painless	<ul style="list-style-type: none"> -Expect to use the medications for 3-6 months before noticing a change in your chin hair eruptions
Laser Hair Removal & Electrolysis	You would not have to shave for 2-5 years	<ul style="list-style-type: none"> -Expensive -Needs to be done by a professional
